Taking the rocketry tests online

First, get a copy of the study guide. Click here https://www.capnhq.gov/CAP.AEDownloads.Web/ to get to the aerospace books from CAP. Scroll down and find the book shown to the right. Click the text below it. The picture below will appear. Click on either of the links next to the red pointers. This is a PDF file. You can download it or read it online. Also, the squadron has one or two copies of the printed book available for loan.

Logon to https://www.gocivilairpatrol.com/

From the upper left hand corner click on Menu

Then click on Online Learning

Then click on Absorb LMS

Then click on the magnifying glass in the upper right hand corner

Several courses may appear. The ones to take are these:

(your screen may have a button to Enroll, if so click all three to enroll)

If, after enrolling, it lists the courses with a start option, then click on one to start it.

Otherwise, click on Civil Air Patrol Learning in the upper left hand corner of the screen. That will take you back to the training home page. Scroll down to the bottom and it should list the rocketry classes, click on one to start it.

To take the test, first read the relevant part of the rocketry book. Redstone pages 10 – 13. Titan 21 – 15. Saturn 40 – 46. The test is open book. All the questions in the tests are from the book.

When all the tests are completed and after all the rockets have been launched (two non-motor rockets and three motor rockets) notify the Aerospace Officer. The system does not notify the Aerospace Officer when tests are complete! After confirmation you will be awarded with a rocketry medal and patch.

If you were not able to make it to a launch, or you missed a session when a rocket was built, speak to the Aerospace Officer about make up oppurtunities.
